

Developer – Internal Applications

There are multiple positions.

Business Overview

Fidelity Clearing Canada (FCC) is the leading independent clearing broker and custodian in the Canadian market. We provide trade execution, clearing, custody and back-office support services to Canadian-based brokerage firms and registered Portfolio Managers.

FCC is developing industry leading advisor platform capabilities for independent Portfolio Managers and Broker Dealer firms. This development will focus on providing integrated service, productivity, and revenue growth tools through a web-based advisor platform. This role will be part of the technology team tasked with developing these exciting business technology solutions.

Job Responsibilities

- This role is accountable for developing, enhancing, modifying and maintaining the application and software solutions for internal clients; for example: Internal development support, Vendor Integration and System data feeds, Non client facing integration and solution delivery
- **Design, code, test, debug** and document computer programs based on specific business requirements to build out new and existing platform and product offering
- Ensures that functional specifications can be implemented technically while developing and innovating commercial technology assets to meet objectives
- Liaise with internal user groups as needed to effectively program applications based on business and systems requirements

Fidelity is proud to offer a telecommuting work schedule. The Developer – Internal Applications will have an alternating schedule of working from home and in the office, on a schedule determined by business need. This position is located in Toronto, ON.
